Ms. Diana Esher  
Director, Air Protection Division  
EPA Region III  
1650 Arch Street  
Philadelphia, PA 19103

Dear Ms. Esher:

On July 30, 2012, AOL submitted an Initial Notification of Applicability to the EPA Region III for the National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines (40 CFR Part 63 Subpart ZZZZ) for our existing sources located at the Manassas Tech Center (MTC). The MTC is located at 7777 Infantry Ridge Road, Manassas, VA 20109.

Upon further review of the aforementioned rules and regulation, AOL has determined that based upon our previous years' emergency generator hours and operation and maintenance schedule, we are able to operate within the 100 hour non-emergency and maintenance run-time requirement of this Rule. Therefore, we are requesting to withdrawal our previously submitted Notification and to please disregard our request to operate these engines as non-emergency generators.

AOL will be operating the stationary reciprocating internal combustion engines at the MTC facility strictly as emergency generators in adherence with 40 CFR Part 63 subpart ZZZZ.

Sincerely,

Alan Nielsen  
Vice President, Corporate Services
